Schools: The Building Blocks of Our Future
Distinctive, Functional and Lasting
Consider the adjectives used to describe brick structure …

words like solid, durable and classic.
Next consider the natural beauty of brick.

Manufactured from clay and shale, brick displays tones and textures giving brick structures their unique appeal. Little wonder that brick has been the choice for architects and builders seeking to create schools that embody both style and strength.

Leading-edge architects and builders typically turn to The Belden Brick Company’s Special Shapes Division. Here they find a dedicated group of artisans and craftsmen able to provide ever-more creative forms of brick to those interested in designing with a difference.
